

A Handful of Stars FAQ

Last updated 22.5.17

Component errors:

The 'Cygnus' card has been printed twice while the 'Eridani' card has been omitted from the deck. The Mugator card should be '3' not '2'.

The Ponthrus card is missing a matter value of '2'.

Replacement cards will be printed to fix these errors. If you already have a copy of the game you can download pdfs of the card, print and apply to the front of the incorrect cards (use card sleeves).

One black 15mm x 10mm game marker is missing. A replacement will be included in all future shipments. If you already have a copy of the game then use one of the Black Hole discs (it is highly unusual to use all of these in the game).

Rulebook errors:

Page 7 – The component examples at the top of the page are inaccurate. The twelve Colony discs are the thin discs while the one Home World marker is the thick disc.

There are only 17 Uninhabitable System tiles, not 19.

Page 13 – The first example image is incorrect. There should only be one Home World disc on the System tile.

Clarifications:

Eridani has a defence of zero.

You can place as many cards as you wish into Reserve, up to the Reserve limit.

You can only use one type of resource on a Development counter.

Only Development counters that have been used are flipped back to their front side.
